Costar Video Systems Exhibits at 2019 Offshore Technology Conference (OTC)

Houston, Texas – May 6, 2019 – Costar Video Systems, a subsidiary of Costar Technologies, Inc. (OTC Markets Group: CSTI), is showcasing new ruggedized cameras inside booth #5107 at the 2019 Offshore Technology Conference (OTC), being held at NRG Park in Houston, May 6-9, 2019.

Costar proudly introduces our ruggedized products made from 316L stainless-steel which provides them with a quality rating of corrosion resistance. Multiple models are also rated as explosion proof with several constructions that have ATEX and IECEx certifications. Powder coated and weather tested, this family of products can withstand the harshest offshore elements and be placed in the most hazardous locations. Our show representatives are ready to demonstrate our IP or HD-Analog options and provide demos showcasing the high standard build of each product.

“We are excited to be attending the OTC show this year. Our line of ruggedized domes is a great fit for this segment of the market,” says Jeff Cullop, VP of Product Management and Purchasing. “We launched this camera line earlier this year to enhance our current product offerings and feel the OTC show with its 50,000 attendees and over 2,000 exhibitors is a great opportunity to showcase our capabilities. We’re ready to give you a demo and showcase a high quality and high functioning product.”
